

Marybeth Radtke serves as the Convergent Manufacturing Principal for the Air Force Sustainment Center AFSC at Tinker Air Force Base Oklahoma. In this inaugural position, she synchronizes the integration of advanced manufacturing technologies to scale AFSC manufacturing capability, mitigate supply chain risks, and drive down sustainment costs. Through structured partnership with academia, industry, and DoW

stakeholders, AFSC is forging strategic alliances to optimize manufacturing, align research to bridge technical gaps, and accelerate production readiness. Dr. Radtke brings over 25 years of dual government and private industry experience. Beginning her career in 1997 as a mechanical engineer at Whiteman AFB, she has since held key leadership roles, including Chief Engineer for two OCALC Maintenance Groups and Technical Assistant at Lockheed Martin Owego.
